

# Status of certified IMS facilities

232 certified International Monitoring System (IMS) facilities as of 12 September 2008

## Notes & quotes

“The Australian Government has today renewed calls for universal adherence to the Comprehensive Nuclear Test Ban Treaty (CTBT). Its entry into force is an immediate disarmament and non-proliferation priority. The CTBT offers a vital framework for these disarmament and non-proliferation objectives, but a decade after its negotiation it is not yet in force. The Australian Government strongly supports efforts to bring the CTBT into force, and to see the completion of its verification system.”

STEPHEN SMITH, AUSTRALIAN MINISTER FOR FOREIGN AFFAIRS,  
IN A MEDIA RELEASE ISSUED ON 12 MAY 2008.
