delay until actual performance, up to a maximum of sixty (60) working days. The recovery by the Commission of proven damages shall not be excluded.

20. FORCE MAJEURE

(a) Force majeure as used herein shall mean acts of God, industrial disturbances, acts of the public enemy, civil disturbances, explosions and any other similar cause of equivalent force not caused by nor within the control of either party and which neither party is able to overcome.

(b) As soon as possible after the occurrence of any cause constituting force majeure, the Contractor shall give notice and full particulars in writing to the Commission of such force majeure if the Contractor is thereby rendered unable, wholly or in part, to perform its obligations and meet its responsibilities under the Contract.

(c) In this event, the following provisions shall apply:
   (i) The obligations and responsibilities of the Contractor under the Contract shall be suspended to the extent of its inability to perform them and for as long as such inability continues;
   (ii) The term of the Contract shall be extended for a period equal to the period of suspension taking, however, into account any special conditions which may cause the time for completion of the obligations to be different from the period of suspension;
   (iii) If the Contractor is rendered permanently unable, wholly or in part, by reason of force majeure to perform its obligations and meet its responsibilities under the Contract, the Commission shall have the right to terminate the Contract on the same terms and conditions as are provided for in the Termination Clause of the Contract, except that the period of notice may be seven (7) days instead of thirty (30) days;
   iv) For the purpose of the preceding sub-clause, the Commission may consider the Contractor permanently unable to perform in case of any period of suspension in excess of ninety (90) days. Any such period of ninety (90) days or less shall be deemed temporary inability to perform.

21. INSOLVENCY AND BANKRUPTCY

Should the Contractor be insolvent, adjudged bankrupt, or should the Contractor make a general assignment for the benefit of its creditors, or should a receiver be appointed on account of the Contractor’s insolvency, the Commission may, without prejudice to any other right or remedy it may have under the terms of the Contract, terminate the Contract forthwith by giving the Contractor written notice of such termination.

22. INDEMNIFICATION

The Contractor shall indemnify, hold and save harmless and defend at its own expense the Commission, its officers, agents, servants and employees from and against all suits, claims, demands and liability of any nature or kind, including cost and expenses arising out of acts or omissions of the Contractor or its employees or subcontractors in the performance of the Contract. This requirement shall extend, inter alia, to claims or liabilities in the nature of workers’ compensation and to claims or liabilities pertaining to intellectual property rights. The obligations under this clause do not lapse upon termination of the Contract.

23. AMICABLE SETTLEMENT

The parties shall use their best efforts to settle amicably through negotiation any dispute, controversy or claim arising out of, or relating to, the Contract or the breach, termination or invalidity thereof. If the parties cannot reach such amicable settlement through negotiations, the matter shall first be referred to conciliation, by a request by either party for conciliation procedures. The conciliation shall take place in accordance with the United Nations Commission on International Trade Law (UNCITRAL) Conciliation Rules then prevailing, or according to such other procedure as may be agreed between the parties, within a time period of ninety (90) days. There shall be one conciliator. The conciliation shall be in Vienna, Austria, and it shall be conducted in the English language.

24. ARBITRATION

(a) In the event of a failure to reach an amicable settlement in accordance with Clause 23 above (amicable settlement), any dispute arising out of the interpretation or application of the terms of the Contract or any breach thereof shall be settled in accordance with the arbitration rules established by UNCITRAL as at present in force. The number of arbitrators shall be one. The arbitration shall be in Vienna, Austria, and it shall be conducted in the English language.

(b) The arbitrator shall take into account the internationally recognized general principles of commercial transactions. The arbitrator shall have no authority to award punitive damages, nor to award interest in excess of five (5) per cent, and any such interest shall be simple interest only. The parties shall be bound by any arbitration award rendered as a result of such arbitration as the final adjudication of any such dispute.

25. PRIVILEGES AND IMMUNITIES

Nothing in or relating to the Contract shall be deemed a waiver of any of the privileges and immunities of the Commission and its employees.

25(a). TAX EXEMPTION

In principle, the Commission is exempt from all Taxes. Since the arrangement under which such exemption is respected varies from country-to-country, the Contractor shall collaborate with the Commission to achieve Tax exemption at source or to pursue reimbursement of Taxes paid by the Commission, as the case may be.

26. TERMINATION

The Commission may terminate the Contract in whole or in part, and at any time, upon thirty (30) days’ notice of
termination to the Contractor. In the event such termination is not caused by the Contractor’s negligence or fault, the Commission shall be liable to the Contractor for payment in respect of Services already satisfactorily accomplished or Goods delivered and accepted and in conformity with the terms of the Contract, for necessary terminal expenses of the Contractor, and for the cost of such urgent work as is essential and as the Contractor is asked by the Commission to complete. The Contractor shall keep expenses at a minimum and shall not undertake any forward commitment from the date of receipt of the Commission’s notice of termination.

27. GOODS

In the event that the Contract requires the Contractor to supply Goods, the following clauses shall apply in addition to the above.

28. WARRANTY

(a) The Contractor warrants that the Goods, including packaging, conform to the specifications for the Goods ordered under the Contract and are fit for the purpose for which such Goods are ordinarily used and for purposes expressly made known to the Contractor by the Commission, and are new and free from defects in design, workmanship and materials.

(b) This warranty shall remain valid for twenty-four (24) months after the Goods or any part thereof have been delivered and accepted, whichever is later, unless the Contractor has granted a longer period. Should the Commission transfer the title of the Goods to a third party during the warranty period, the right to enjoy the warranty shall be transferable to the new title-holder.

(c) If, during the warranty period mentioned in Sub-clause (b) above, the Goods or any part thereof are found to be defective or not in conformity with the specifications under the Contract, the Contractor shall, upon notification, promptly and at its own expense correct all such defects and non-conformities. If these defects and non-conformities cannot be corrected, the Commission shall have the right, at the Contractor's expense, to either demand replacement of the defective item, or receive appropriate reimbursement, or have the defective item repaired or otherwise procured from a third party.

29. INSPECTIONS AND TESTS

(a) The Commission shall have the right to inspect and/or to test the Goods to confirm their conformity to the technical specifications. The technical specifications shall specify what inspections and tests the Commission requires.

(b) The inspections and tests may be conducted on the premises of the Contractor or its subcontractor(s), at a point of delivery designated by the Commission and/or at the Goods’ final destination. The Contractor shall give all reasonable facilities and assistance-including drawings and production data-to the Commission at no charge to the Commission.

(c) Should any inspected or tested Goods fail to conform to the technical specifications, the Commission reserves the right to reject them and the Contractor shall either replace the rejected Goods or make all alterations necessary to meet specification requirements free of cost to the Commission.

(d) The Commission’s right to inspect, test and, where necessary, reject the Goods after the Goods’ arrival at the point of delivery designated by the Commission or at the Commission’s offices, shall in no way be limited or waived by reason of the Goods’ having previously been inspected, tested and passed by the Commission.

(e) Nothing in this Section on Inspections and Tests shall in any way release the Contractor from any warranty or other obligations under the Contract.

(f) All equipment/material supplied under the Contract may be subject to pre-shipment inspection by a third party to be specified by the Commission. The Contractor is not liable for cost of this inspection.

30. PACKING

The Contractor shall comply or ensure compliance with the following provisions concerning packing:

(a) The Goods shall be packed as is required to prevent their damage or deterioration during transit to their final destination. The packing shall be sufficient to withstand, without limitation, rough handling during transit.

(b) In the case of a cross-border shipment, the Goods shall have appropriate export packing. If necessary, all cases/crates must be wrapped inside with heavy-duty plastic lined paper, should be steel-strapped and must be able to withstand tough handling. Skids for truck handling are imperative if the gross weight is more than 30 kilograms.

(c) The consignment shall be marked and shipped as per address shown on the Purchase Order Form.

(d) Neither partial delivery nor transhipment shall be made unless specifically agreed by the Commission in writing.

(e) Each case/crate/package shall carry a consecutive number, dimensions, volume, and weight (i.e. Case No. X of Y cases, A x B x C cm, E m3, D Kg.) and shall be marked as follows:

```

THE PREPARATORY COMMISSION FOR THE
COMPREHENSIVE NUCLEAR-TEST-BAN
TREATY ORGANIZATION.

```

(f) Markings shall be done with weatherproof materials. All non-containerized Goods shall be shipped below deck.

(g) Each case/crate/carton shall carry (outside) a copy of the packing list describing the contents of the case/crate/carton. Outside Case No. 1 should be
attached with invoice covering the actual delivery. The accompanying papers must be made out in the English language.

(h) Prior to delivery, a fax (or a letter by courier service) shall be sent to the consignee, if any, advising of the following:

- purchase order/Contract number;
- waybill number or equivalent reference number of the shipment (if any);
- number of boxes/cartons/crates/etc.;

(i) The following documents shall be enclosed with the shipment in case of shipping by air:

- airway bill;
- proforma or commercial invoice;
- packing list.

(j) The above documents are indispensable and must reach the consignee, if any, on time to permit customs clearance and in order to avoid demurrage charges.

31. DELIVERY AND TRANSPORTATION

(a) Delivery of the Goods shall be made by the Contractor in accordance with the terms specified in the Contract, and the Goods shall remain at the risk of the Contractor until delivery has been completed.

(b) Transport of the Goods to the port of discharge or such other point in the country of destination and/or forwarding to the consignee, if any, (door-to-door) specified in the Contract shall be arranged and paid for by the Contractor and the cost thereof shall be included in the Contract Price.

32. TAKE-OVER/HAND-OVER

Upon successful completion of delivery or of installation and a testing and evaluation period, as specified in the Contract, responsibility for the Goods will be handed over to the consignee or other designated entity.

33. EXPORT LICENCES

If an export licence or any other governmental authorization is required for the Goods, it shall be the obligation of the Contractor to obtain such licence or governmental authorization. In the event of failure to obtain such licence or authorization within reasonable time, the Commission may declare the Contract null and void.

34. SPARE PARTS

In accordance with the Contract, the Contractor may be required to provide any or all of the following materials and notifications pertaining to spare parts manufactured and/or distributed by the Contractor:

(a) Such spare parts as the Commission may choose to purchase from the Contractor, provided that the Contractor is not relieved of any warranty obligations under the Contract;

(b) In the event of termination of production of the spare after delivery of the Goods:

(i) advance notification to the Commission of the pending termination, in sufficient time to permit the Commission to place a final order;

(ii) following such termination, furnishing at no cost to the Commission, the blueprints, drawings and specifications of the spare parts, if and when requested.

35. UNITED NATIONS CONVENTION ON CONTRACTS FOR THE INTERNATIONAL SALE OF GOODS

Questions concerning matters arising under the Contract, but not settled in it, shall be settled in conformity with the United Nations Convention on Contracts for the International Sale of Goods (Vienna, 1980), which shall be applicable to the Contract. The applicable language version of the Convention shall be the version in which the Contract is written.

ANNEX B

TERMS OF REFERENCE

DATA STORAGE AND READ-OUT SYSTEMS FOR METEO STATIONS

1. BACKGROUND

The Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization with its headquarters in Vienna (hereinafter referred to as “the Commission”) is the international organization mandated to establish the global verification system foreseen under the Comprehensive Nuclear-Test-Ban Treaty (CTBT), which is the Treaty banning any nuclear weapon test explosion or any other nuclear explosions. The Treaty provides for a global verification regime, including a network of 321 stations worldwide, a communication system, an international data centre and on-site inspections (OSI) to monitor compliance with the Treaty.

Indications for an underground nuclear explosion (UNE) involve information on the presence of radioactive noble gases that are of relevance to an OSI, notably xenon and argon. OSI sampling equipment is being used to collect both atmospheric gas samples and subsurface gas samples. Weather data such as wind speed and precipitation are measured before and during sampling to support the interpretation of the noble gas samples. The data of the existing weather stations is currently only accessible in conjunction with the noble gas sampling equipment. To further increase the capability and modularity of the equipment, the Commission is seeking to read out the weather data of the existing meteo stations independently of the gas sampling equipment.

The Commission outlines here the Terms of Reference (ToR) for the construction and delivery of three (3) data storage and read-out system for the existing meteo stations.

2. GENERAL REQUIREMENTS

The Contractor shall construct and deliver in accordance with these ToR and in the most cost-effective manner three (3) data storage and read-out systems for the existing meteo stations (herein referred to as “systems”).

These ToR define both the technical specifications and the detailed framework of the equipment and related services and activities to be carried out by the Contractor.

3. SCOPE OF WORK

3.1 General scope

The Contractor shall:

1. Design, supply and deliver the systems to the Commission according to these ToR.
2. Provide documentation and training.
3. Coordinate with and regularly update the Commission on all services and related activities under this Contract.
3.2 Quality and Workmanship

The Contractor shall provide systems that are made with high quality workmanship and of good materials and implemented based on Best Engineering Practices and the Scientific Method. The Contractor shall be responsible to address and take corrective actions to eliminate early deterioration and damage of equipment under the warranty clause of the present contract.

The Contractor shall have demonstrated capabilities and experience in electric engineering, demonstrated by proven records of achievements (e.g. reports or publication).

If non-compliances with the requirements of the present Contract are revealed, the Commission’s representative shall notify the Contractor of these non-compliances and recommend corrective actions which the Contractor shall address and eliminate in a timely and professional manner. For the explicit processes related to this Contract, please see further information and requirements related to Remedial Actions in Section 5.

4. COMMUNICATION

The Commission’s Technical Officer appointed as the Point of Contact (PoC) for this Contract will closely liaise with the Contractor throughout the period of this contract.

The Contractor shall:

1. Coordinate and regularly update the Commission on all services and related activities under these ToR,
2. Respond efficiently and accurately to technical and administrative questions from the Commission,
3. Ensure that all communication will be in the English language and, if not in person, through e-mail, phone or video conferencing,
4. Provide a written report in the case of Remedial Actions, see Section 5.

The Commission reserves the right to provide comments and request revisions on any report as well as to request additional information within four weeks of receipt of a report.

5. REMEDIAL ACTIONS

In the event that the Commission is not satisfied with the Contractor’s equipment and/or services as outlined in these ToR, a request for Remedial Actions is provided in writing by the Commission to the Contractor outlining the issues to be resolved.

The Contractor shall remedy the defects as per the Commission’s request and submit a Remedial Actions Report in electronic format within four (4) weeks after receiving the request from the Commission, which includes the time to ship the system to the Contractor’s location, or other designated facility.

6. TECHNICAL SPECIFICATIONS

The Contractor shall have an all-inclusive approach to the work to be undertaken within the framework of this contract and shall take into account/refer to all the internationally available scientific and technical developments and state-of-the-art know-how, as well as technical guidance from the
Commission. The Commission expects a transparent work process and that all specifications be documented and shared in technical detail with the Commission.

The Contractor shall consider – as a minimum – the requirements listed below.

6.1 General operational requirements

The systems shall:
- Store the meteo data from the three existing GILL GMX600 compact weather stations
- Be capable for the data retrieval (LAN cable, SD card, or similar)
- Be air transportable and cannot contain items excluded from air transportation by IATA (e.g. Lithium metal batteries over a certain size etc.).
- Be field deployable and human portable.
- Be ruggedized.
- Be operational for as long a time period as possible (see also Power).

6.2 Power

- Provide 5 to 35 Vdc power solutions for the GILL GMX600 compact weather station (64 mA continuous high mode for 12 Vdc).
- Provide 5 to 35 V power solutions for the data storage systems.
- The Commission can provide 12Vdc car batteries, 60Ah. However, a more compact and field suitable solution is preferred.

6.3 Data Parameters

- The time resolution for the meteo data shall be in the range of 1 data point every 1 to 15 min.
- Data format shall be CSV format or similar.

6.4 Physical setup

- One of the three existing GILL GMX600 compact weather stations already has a (custom-made) tripod solution for setup at 1 to 1.5 m above ground. Consider designing and providing tripod setup solutions for the other two (2) weather stations.
- Consider designing and providing a setup on the tripod for the data storage and read-out systems.

7. DELIVERY AND TIMELINES

The project shall be executed according to the following schedule after acceptance of the contract.

1. Phase 1: Project initiation meeting (teleconference) – within two (2) weeks of contract signature.
2. Phase 2: Technical consultation process and selection/approval of preferred option – within eight (8) weeks of contract signature.
4. Phase 4: Delivery of the system and training – within four (4) weeks after the successful functionality testing.
8. DOCUMENTATION AND TRAINING

The Contractor shall deliver, together with the system, the following documentation:

- Installation, operating and maintenance instructions — complete with technical details — in English.
- Complete list of consumables and spare parts.
- Itemized inventory of all equipment composing the system.
- Complete documentation of all Material Safety Datasheets as required for transportation (if DG components are used).
- Country of Origin certificates of all major components/system.

The Contractor shall provide all technical training in the English language if such specific training is required for the operation of the system, as follows:

- at the “to be defined” and suitable location,
- upon the request of the Commission,
- after the delivery of the system(s),
- for up to maximum 2 days.
